

FIRST DECENTRALIZED
WEB-CAM PORTAL
FOR ADULTS

Dear Guest,

Our team is pleased to introduce to you our revolutionary project Sqirt – first decentralized webcam platform. The niche of webcams is a prominent and lucrative segment of porn industry with millions regular viewers and more than a billion annual revenue.

Sqirt is intended to eliminate current inconveniences and threats represented by existing platforms:

- Sky-high fees
- Transaction limits and delays
- Complicated and time consuming registration
- Confidential information leakages

By eliminating one center of data and money transactions, Sqirt is aimed to remove unfair money allocation, secure privacy and set ultimate technological and environmental conditions for users.

Emission of SQR tokens is organized to achieve the following goals:

- Build technically complex platform
- Maintain and constantly develop it
- Introduce upgrades chosen by SQR holders after release

Why purchase SQR coins? The initial price of SQR tokens is set at level that would provide the project with initial capital and all the accommodating spendings. After the project is released it is expected to grow driven by the industry boom with following increase in customer value and consequently price of each coin. First chosen participants of our ICO will receive privilege and discounts to buy stakes in bulk.

Participating in Sqirt ICO is also beneficial for those who are interested in the very concept of the project – future users – as they save money and achieve cheaper access to portal features such as private shows, tips and additional bonuses, which will have 0% fee for SQR transactions.

Our team would be extremely thankful if you could help us to spread public awareness about the project in social media in seek of enhancing and benefiting the community and common welfare.

Faithfully yours,
Sqirt team.
